

## SorbAll Corner Bass Trap

SorbAll Corner Bass Traps are a lightweight LOW frequency absorber that effectively reduces hard to control corner reverberation. NCS uses the beauty of fabric to create an aesthetically pleasing effective room component.

Our Corner Bass Traps are available in a variety of colors and provide excellent results.

### **Acoustical Core**

6-7 PCF rigid fiberglass core

### **Edges**

Edges are back mitered to fit perfectly into corners to create both a decorative and functional corner absorber. Edges are chemically hardened to resist damage and provide clean, crisp edge profile
